

# SYCHEM CHANGE

## Our class-leading dual access change station

Sychem provides a comprehensive range of animal care solutions, services & consumables to support research facilities in providing the best conditions for the animals in their care.

## Active Airflow Technology

SychemCHANGE utilises Sychem's Active Airflow Technology to protect both animals and technicians.

ISO Class 3 airflow ensures a barrier of protection between animal and operator, limiting the potential for cross-contamination and maximising staff safety.

Designed as a dual-access workstation, the unit is compatible with all rodent cages and features a fully reversible TRESPA® worksurface, available in either a fixed raised or lowered position.

### Easy Cage Change

SychemCHANGE has a large work area, ideal for various rodent cage sizes. The cage lid holder supplied as standard enables quick, aseptic cage changing. The station is perfect for complete, base-only cage changing and cleaning procedures.

### Ergonomic Excellence

SychemCHANGE offers the best height range on the market, making it suitable for any user. At the touch of a button, the electrically driven legs can be raised or lowered, maximising the user's comfort levels and simplifying the cleaning process.

### TRESPA® worksurface

SychemCHANGE features a fully reversible TRESPA® worksurface, providing a chemical & impact resistant worktop. Clients can order the worksurface in either a fixed raised or lowered position.
