**With over 40 years of experience, Sychem are a leading, expert provider of disinfection, sterilisation & decontamination solutions.**

We operate predominantly within the Healthcare, Laboratory and Life Science sectors. Our talented team provides various bespoke product solutions, services and a range of industry-leading chemicals.

## Our Training Academy

At Sychem, we provide a comprehensive service to all our customers and are committed to offering not only first-class decontamination equipment but also full training for staff provided by our very own Training Academy.

With a range of training packages available, taking place either on-site or at our training centre in Hampshire, we aim to enable safe, accurate and reliable operation for all decontamination equipment and systems. Offering tailor-made courses to suit your needs, we're here to help you ensure your facility continues to operate as efficiently as possible with minimal downtime.

### Training Overview

- Training packages in our Hampshire training academy are offered for up to groups of 4
- Use of loading accessories is available for training. Including trolley and racks
- Training is delivered by our industry leading experts who specialise in the field of sterilisation and disinfection
- Training will be booked in by the Sychem Resource Coordination Team with all attendees names being required at time of booking
- Competence certificates will be provided electronically on completion of the training
